

HOW TO STAY ELEGANT AND EFFICIENT WITH SPARSE RESOURCES - USING COMMON SENSE AND LOGICS FOR HEALTHCARE QUALITY MANAGEMENT

Bourek Aleš

ESQH and
Center for Healthcare Quality
Medical Faculty
Masaryk University
Brno, Czech Republic

April 24-25, 2014

3rd & 4th Regional Health Authority

CONFERENCE & WORKSHOPS:

Building a Quality and Patient Safety
Culture in Health Services: Experience and
Prospects

Presentation setup

- **The healthcare environment**
- **Logic and semantics**
- **Why things don't work**
- **What to do and mainly HOW to make it work**

HC ENVIRONMENT - LOOK FOR attributes / „blocks“

WITH A PERFECT „PUBLIC“ RECORD & OUTCOMES

(accountable)

MANAGED (leadership confident, wise, un-selfish)

with a CODE/GENOME (development/growth, off-springs, existing and used framework – common mindset, with a

memory) LEAN (elegant, streamlined, transparent, efficient)

STANDARD (minimizing unexpected and avoidable burdens = using PATHWAYS)

SPECIALIZED (focused, doing limited No. of things but excellently = KNOWHOW)

COMMITTED (philosophy existing, patient centred, altruistic)

INNOVATING (horizon-scanning **BUT** used with a time-lag, „conservatism in the best sense“)

OPEN (willing and able to share, disclose, teach)

RELAXED (low staff fluctuation, happy smiling people)

In „bad“ times (if not always)

- **Reuse (modify) existing**
- **Don't look at the „rich“, learn from the „poor“** (e.g. Developing a hospital quality improvement initiative in Lesotho www.emeraldinsight.com/0952-6862.htm)

Prioritization matrix

- **Potential impact of improvements on outcomes**
- **Improvement feasibility**
- **Local and national-level support**
- **Issues urgency**

- **Decentralize projects to multidisciplinary QI teams (bottom-up) approach**
- **Support QI teams**

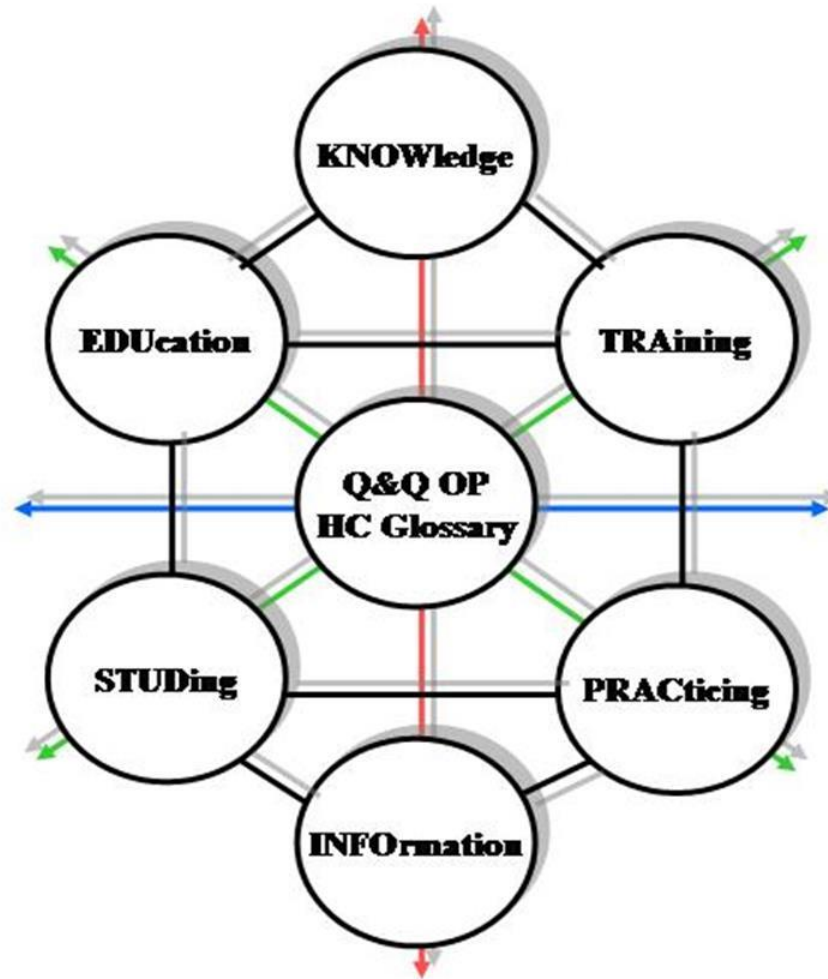

„Just in time“ training

- **Develop „SMART“ objectives (-specific, -measurble, -attainable, -realistic, -time-bound)**
- **Use simple data capture systems**
- **Use short PDSA cycles**
- Identify Service bottlenecks
- Develop goals
- Prioritize goals
- Develop interventions
- Manage and interpret data
- Motivation tools

Glossary centred learning

Ambiguity prevention = efficient collaboration

HC Quality

- Patient-centered
- Safe
- Effective
- Timely
- Efficient
- Equitable

Changing behavior – habits

**Produce “on-demand” not
“for the shelf”**

Why things don't work

- Healthcare today is a complex process and the service is delivered by „many“ caregivers
- We do not teach and practise teamwork
- The patient and his family is not an organic part of the team
- The „product“ has no ownership and no „common“ value

Why things don't work

**Why so many attempts for implementation fail
/1996 – 2014: our experience with > 50 projects/**

- **We expected active data collection (on the side of physicians and medical staff)**
- **We combined healthcare evaluation with scientific grants and goals**
- **We undervalued common clinical parameters and analyses of potential benefits of computerization**
- **We did not respect organizational rules of the system**

Logic and semantics

Characteristics of difficult problems

Difficult problems have some typical characteristics that can be summarized as follows:

- **Intransparency** (lack of clarity of the situation)
 - commencement opacity
 - continuation opacity
- **Polytely** (multiple goals)
 - inexpressiveness
 - opposition
 - transience
- **Complexity** (large numbers of items, interrelations, and decisions)
 - enumerability
 - connectivity (hierarchy relation, communication relation, allocation relation)
 - heterogeneity
- **Dynamics** (time considerations)
 - temporal constraints
 - temporal sensitivity
 - phase effects
 - dynamic unpredictability

Logic and semantics

TRIZ (pronounced [triz]) is a Russian acronym for "Teoriya Resheniya Izobretatelskikh Zadatch" (Теория решения изобретательских задач), a Theory of solving inventive problems or Theory of inventive problems solving (TIPS)(less known as Theory of Solving Inventors' Problems), developed by Genrich Altshuller and his colleagues since 1946.

TRIZ is a methodology, tool set, knowledge base, and model-based technology for generating innovative ideas and solutions for problem solving. TRIZ provides tools and methods for use in problem formulation, system analysis, failure analysis, and patterns of system evolution (both 'as-is' and 'could be'). TRIZ, in contrast to techniques such as brainstorming (which is based on random idea generation), aims to create an algorithmic approach to the invention of new systems, and the refinement of old systems.

Logic and semantics

Lexical FreeNet

Shortest paths between *quality* and *teamwork*

- Synonymous ↔
- Triggers →
- Generalizes →
- Specializes ←
- Rhymes ↔
- Anagram of ↔

Word 1:
Word 2:

Connection

quality → sophistication ↔ cooperation →
teamwork

quality ↔ character → actor ↔
worker → workmate ↔ teamwork

quality → sophistication ↔ cooperation →
teamwork

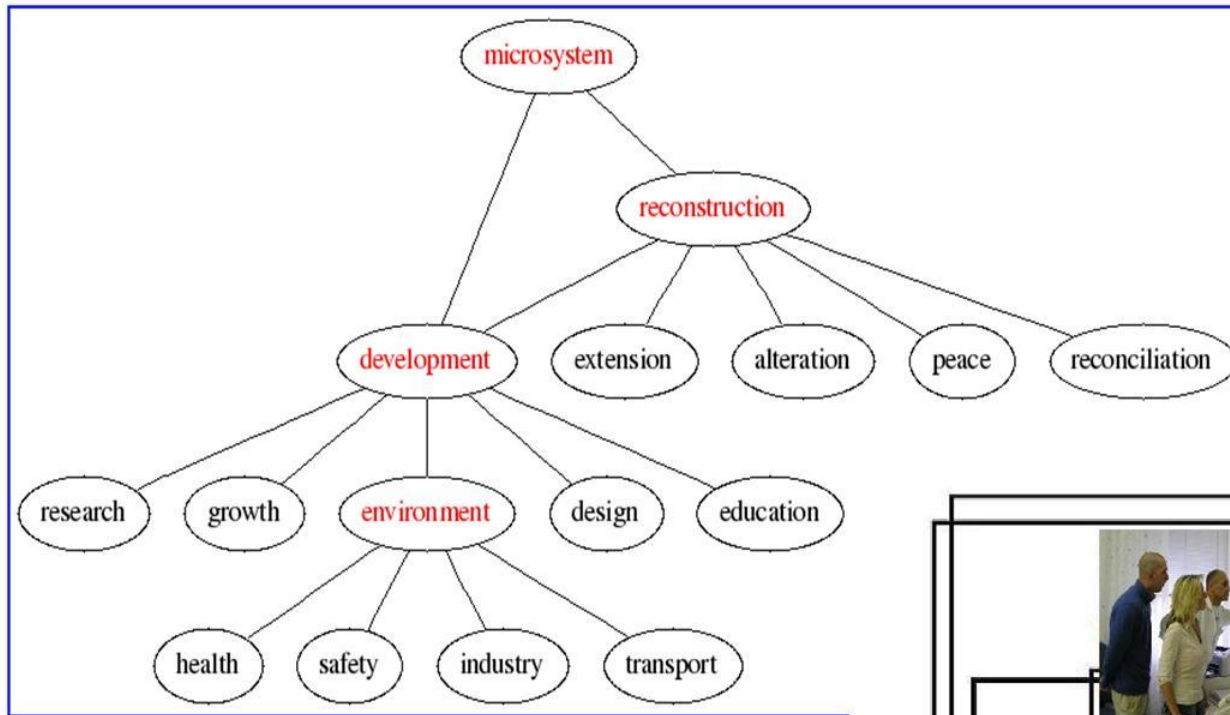

Cooperation - BNC

Cooperation - MEDLINE

Logic and semantics

Microsystem - BNC

**DECOMPOSITION =>
CLINICAL MICROSYSTEM –
smallest functional HC system
unit (PEOPLE + INFORMATION
INFRASTRUCTURE)**

HOW to make it work ?

START with pathways:

1. Devised bottom-up (by users for users)
2. Respecting the HC logics and language
3. Get all stakeholders „together“
4. Provide a meaning of „team“
5. Make feel the „ownership“ of the HC process and it's results

Complex services must rely on data

Physicians

Managers

Public

Data must be processed to information and knowledge

Visualisation - Interpretation

ASSESSED LEVEL

Single patient
– episodes / technology

Single patient
– overall results

Group of patients
– episodes / technology

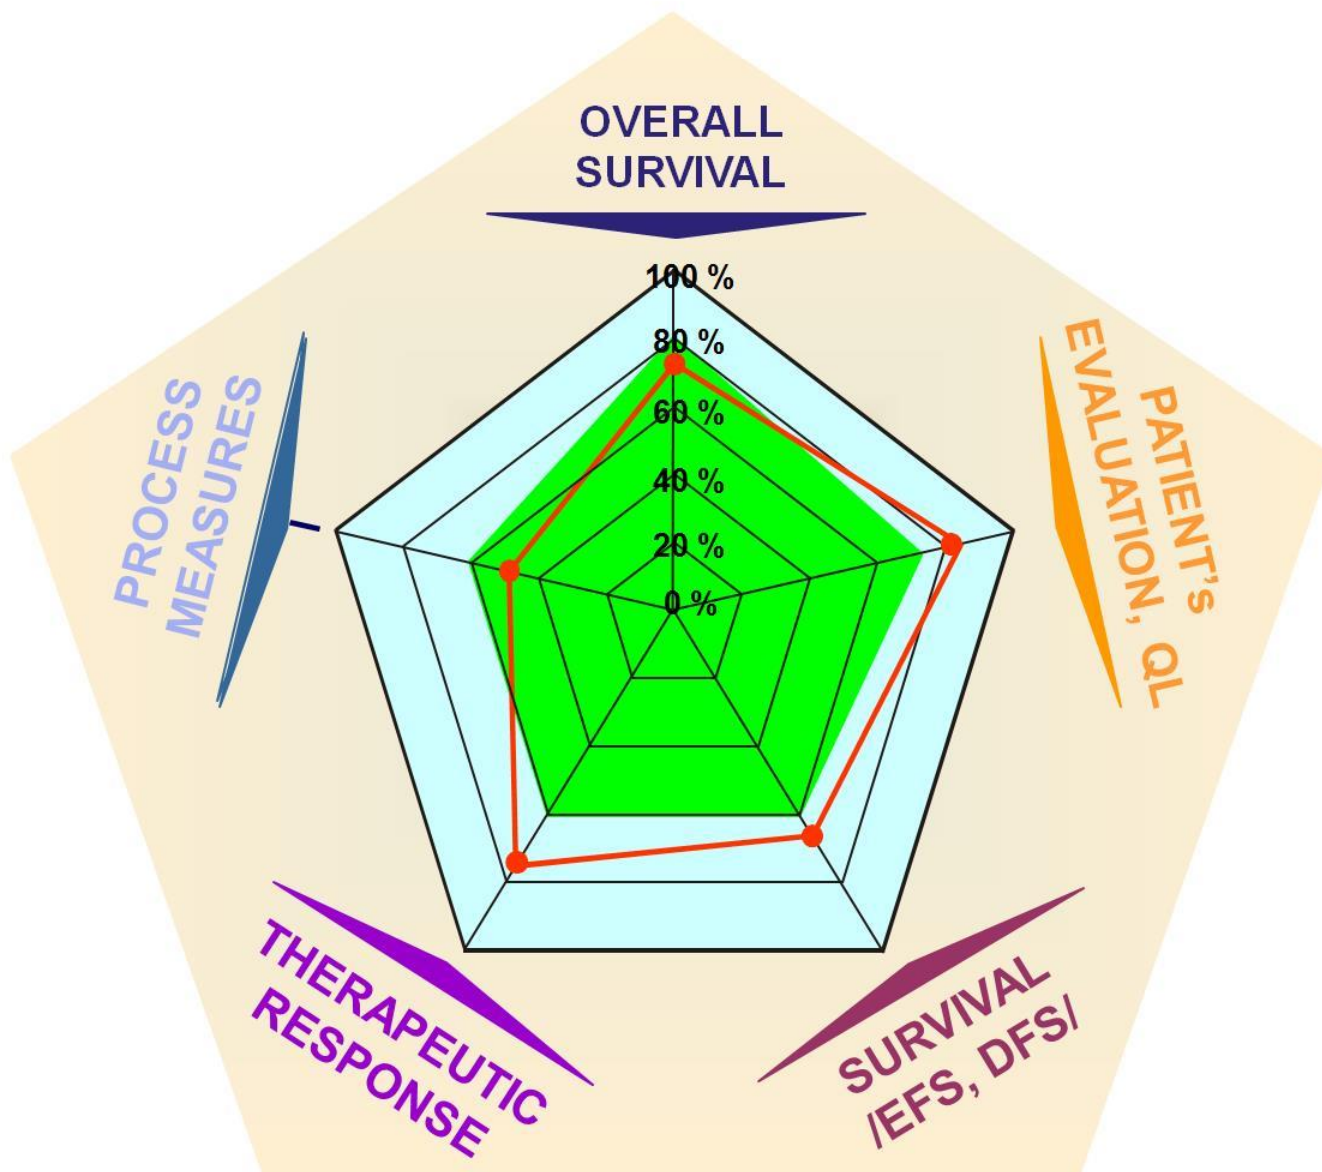

Group of patients
– overall results

Evaluated

"temperance" not in database
OHSUMED

OHSUMED
sobriety

Chastity - (lean process)

Chasteness

Synonyms

Restraint [n]

discipline in personal and social activities.

"he was a model of polite restraint"; "she never lost control of herself".

Example: inhibition self-restraint temperance continence

Austerity
Temperance
Sobriety

**IS DEVELOPED ONLY
BY TEAM-WORK**

(rational responsible behavior culture)

Rational care

Looked Up:

rational

Meanings:

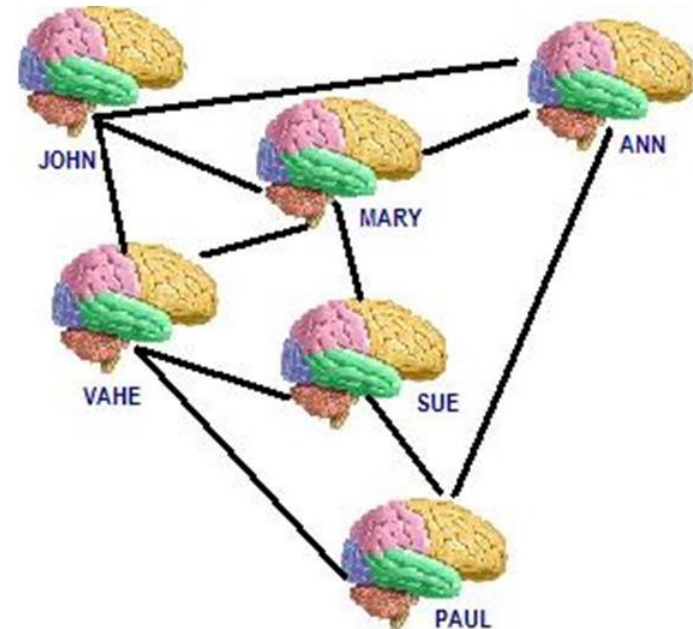

- lucid (adj.)
- based on reason (adj.)**

Replace with Synonym:

- based on reason
- based on reason**
- sensible
- reasonable
- logical
- realistic
- sound
- wise
- judicious
- illogical (Antonym)

Replace with Synonym:

- lucid
- lucid**
- balanced
- sane
- normal
- cogent
- coherent
- irrational (Antonym)

EFFECTIVE INTERVENTIONS

- ***ADVANCES IN MANAGEMENT***
 - ***ADVANCES IN INFORMATION SHARING***
 - ***ADVANCES IN EDUCATION***
 - ***ADVANCES IN ACCOUNTABILITY***
-
- ***Σ ADVANCES IN TEAM-WORK***

ART of TIMING / TACTICS

*To every thing there is a season and a
time to every purpose under the heaven*
Ecclesiastes 3:1

RIGHT INSTINCTS badly NEEDED !

ANATOMISCHE LES

De centaur Cheiron onderwijst de kleine Asklepios in de beginselen van de geneeskunst

ontwerp en uitvoering: Theo van de Vathorst

IT DOES NOT MATTER

It really does not matter

**IT DOES NOT MATTER WHICH QUALITY
APPROACH YOU USE AS LONG AS IT
ADHERS TO COMMON QUALITY LOGICS**

Why do it ?

What you are is what you have been.
What you will be is what you do now.

THE BUDDHA, Tibetan Book of Living and Dying
